Profile

I am a passionate and creative Unity developer with several years of experience creating small projects of my own. Last year I completed a certificate IV in Information Technology/Video Game Programming at NSW TAFE which allowed me to further develop myself to the point where I am now confident that I have the skills to enter the industry as a junior to mid-level developer. I have created projects within various genres, such as platformers, puzzles, and simulations, using C# and Unity tools. A sample of my projects can be seen on my web page, accessible from the link above.

Prior to this I have enjoyed a long career as a Technical Support Engineer where I developed proven analytical problem solving, time management and customer relationship skills.

Skills

- Experienced working within Unity Environment
- Strong C# knowledge
- Demonstrated problem solving / analytical ability
- Strong verbal and written communication skills
- Familiar with Unreal Blueprint and C++ workflows
- Proven client and stakeholder relationship management ability

Education

Certificate IV in Information Technology (Video Game Programming)

Completed December 2023
